Index

Booksterilizer EBS Series

In various publications used in library, there exist various bookworms, germs such as H1N1 flu etc. viruses and opportunistic infection viruses such as colon bacillus, dust, fungus, etc.

Chemicals like ammonia, formaldehyde and xylene are known as deadly substances that cause cancer.

Booksterilizer

It removes various viruses, isease-causing germs and colon bacillus even with DNA through UV ray disinfection and it is helpful to form comfortable and safe reading culture.

• Germes exist in books?

H1N1 Flu
Bookworm
Hand carry bacteria
Bacteria
Dust
Colon bacillus

- Acquired 99.9% disinfection test report from Korea Testing & Research Institute.
- Noise lower than 50dB.
- Warrant long life-time of lamp 3 times (30,000 times of on/off cycle) more than other product of rival company.

UV lamp

It disinfects various in book by using UV lamp (UV-C lamp) which radiates 253.7 wave length, which has most outstanding disinfection effect among UV wave lengths.

Internal circulation

LIVA book disinfector uses internal circulation structure which does not take in external air. Therefore no external dust flows in and removes dust from book efficiently and delaying filter replacement.

Air blower

Remove dust from books by the wind of fan, maintaining opening of book so that UV light can reach to inside of book.

Phytoncide deodorant

This is non-toxin natural antimicrobial deodorant made with 100% natural vegetal material. It deposits on odor molecule and decompose. So odor is removed and fragrant phytoncide aroma sustains. It protects from salmonella, colon bacillus and staphylococcus aureus safely with its strong antimicrobial effect.

1) 9.7 inch Information LCD

Add Digital Board Functions to deliver the news of the library/ school and new publication information.

2) 5.1 inch Custom LCD

LCD indicates various functions.

3) Start button
